Valorisation of Agro-Industrial Wastes via the Production of Zeolite-based composite materials and their use in Environmental Remediation and Biofuel production.

Welcome to the VALZEO 6th Newsletter. In this edition, we highlight recent developments across the project, including secondments, new funding opportunities, and key dissemination activities. We also present upcoming events as VALZEO continues advancing circular and sustainable solutions in its final project phase.

LOOKING AHEAD

PROJECT COORDINATION

VALZEO Moving Toward Final Phase

The VALZEO consortium continues progressing toward its final phase, focusing on strengthening collaboration, advancing pilot-scale validation, and preparing upcoming activities. Ongoing coordination efforts support alignment across work packages and ensure the successful delivery of project objectives and impact.

TRAINING & SECONDMENTS

VALZEO Secondments Strengthen Sustainability Assessment

Recent secondments continue to reinforce knowledge exchange across the consortium. Activities focused on sustainability assessment, research management, and integrated evaluation of pilot-scale solutions contribute to VALZEO's holistic approach, combining environmental, social, and economic dimensions of innovation.

SCIENCE & INNOVATION

Advancing Circular Bioeconomy Solutions

VALZEO continues to develop innovative zeolite-based materials from agricultural waste, supporting applications in water treatment, environmental remediation, and biofuel production. Current activities strengthen the link between laboratory research and real-world implementation, contributing to sustainable and scalable solutions.

Celebrating 30 Years of MSCA

VALZEO joined the celebration of 30 years of Marie Skłodowska-Curie Actions (MSCA), recognising their impact in supporting over 150,000 researchers worldwide. As an MSCA Staff Exchanges project, VALZEO contributes to this legacy by advancing sustainable innovation and international collaboration through zeolite-based solutions.

VALZEO Highlights CBE JU 2026 Opportunities

VALZEO highlighted the upcoming CBE JU 2026 call for proposals, encouraging stakeholders to explore funding opportunities supporting circular bio-based innovation. Info days and networking events will support collaboration and proposal development across Europe.

VALZEO at CBESF 2026

VALZEO is engaging with the Circular Bioeconomy & Bioenergy Summit 2026 (CBESF2026) in Brussels, bringing together key stakeholders from policy, industry, and research. The event supports the transition of bio-based innovations into large-scale industrial solutions.

Strengthening EU-LAC Research Collaboration

VALZEO highlighted the importance of international collaboration through engagement with EURAXESS Latin America & Caribbean (LAC). The initiative supports researcher mobility, funding access, and cross-regional partnerships between Europe and LAC.

EVENTS & DISSEMINATION

VALZEO will organise a key workshop in Ancona (Italy) on 21-22 May 2026, hosted by UNIVPM.

 21 May 2026

- Workshop (afternoon)
- Science Café (evening)

 22 May 2026

- Project Meeting (morning)
- Visit to WHEELab laboratories (afternoon)

 Workshop Title:

Sustainable Water Treatment: LCA and Industrial Applications of Innovative Materials

Confirmed speakers include:

- Prof. Chiara Giosuè – Waste-derived materials for air and water treatment
- Dr. Carla Maggetti – LCA approaches for innovative materials

The consortium is invited to contribute additional speakers and presentations.

LOOKING AHEAD - FINAL PROJECT YEAR

As VALZEO advances toward its final phase, the project will focus on:

- Final secondments
- Pilot-scale validation
- Scientific publications
- Policy and impact activities
- Strengthening dissemination and exploitation

The consortium remains committed to delivering strong scientific, technological, and societal impact.
